

Customer satisfaction is paramount

One of the greatest strengths at KLG is that our experienced workforce will see the job through from start to finish. From survey to installation of the finished product, the entire job is carried out "in house" and will not be regarded as completed until the customer is totally satisfied.

In addition to our warranty certificate which is issued with each and every job, to promote continuous improvement and ensure continued client satisfaction, all of our customers are issued with a questionnaire for completion.

As you can imagine with thirty five years of trading we have many thousands of satisfied customers and you are welcome to view these questionnaires at any time.

Don't take our word for it – see what some of our previous clients have to say about their experiences with KLG.

“Highly delighted with finished products and the installation team were brilliant, we would have no hesitation recommending you.”

Mr & Mrs Chapman, Warren Wood

Financing your purchase

With KLG you can spread the cost of your home improvement over a number of years.

We can offer an unsecured loan with Consumer Credit Act protection backed by a leading finance company.

Quick and easy to arrange in your own home with a repayment period to suit your individual circumstances our financing package leaves your savings untouched and puts you in control.

Ask for a detailed quotation.

“Many thanks for a lovely job, the windows have been returned to their original design”

Mr & Mrs Kennerley, Edwalton

“Once again a job well done, this is why we keep coming back.”

Mr & Mrs Woolacott, Sherwood

Windows of Distinction

KLG's range of superbly styled and crafted PVCu windows will enhance the natural character of any property.

Whatever the age style or size of house we have a range of window systems that will transform it into a home to be loved and admired.

Choosing the right windows for your home is important. That is why we offer a wide and versatile range of styles for you to choose what suits you and your home.

Casement Windows

The casement window design is by far the most popular PVCu replacement window used in Britain today and proves to be an ideal replacement for timber section windows.

Our casement window comes in two distinct styles – chamfered which has straight clean lines mimicking the traditional putty checked timber style and Oval which provides a classic moulded feature to the frame edging.

You can also have a mix of the two styles with a chamfered outside and oval beading inside.

Tilt and Turn

This very distinctive continental window offers a chic appearance whilst combining excellent ventilation and security.

Tilting inwards from the bottom providing ventilation both at the sides and top this window can also turn from the side to provide fire egress and easy cleaning options.

Cream de la Cream

Our cream window is proving to be ever more popular providing its own distinctive appearance wherever it is utilised.

Is it wood?

A choice of outstanding and realistic wood grained finishes alongside our pure white and cream options gives you the opportunity to select the perfect compliment to your home.

A combination of any of these colours and finishes can also help to make your home distinctive. Perhaps pure white windows with a wood grained sill!

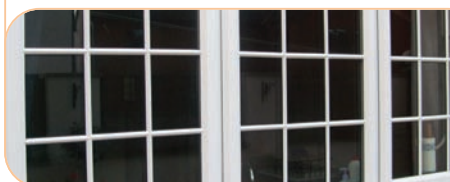

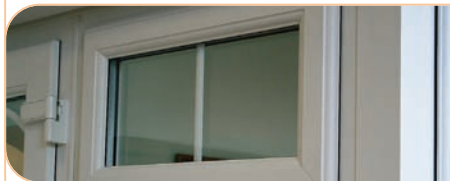

Decorative Options

The decorative options for the glazing in your windows are limitless.

Traditional rectangular or diamond leads remain popular. We can recreate the decorative coloured leaded lights of yesteryear or even renovate and sandwich your original leads inside the new sealed units.

Georgian Bars inside the sealed units can provide that Neo Georgian look or we can provide an authentic face applied bar for the more realistic Georgian appearance.

Security

Manufacturing a window which looks good and suits your home is only acceptable if the window is secure enough for the times we live in.

Designed to work with the latest generation of high security locks and hinges our windows are designed to offer unbeatable security.

All of our windows are fully welded and internally beaded to help prevent burglars from removing the glazing to gain entry to your property.

Energy Efficient Glazing

SGG EcoClear is the most technically superior glazing solution available today and is incorporated in the KLG window as standard. Combining Planitherm Total glass with argon gas, aluminium spacer bar and standard glass provide a C Window Energy Rating.

In fact SGG Eco Clear offers up to 3 times more thermal insulation than standard double glazing and 20% better insulation than old fashioned thermally insulating glass.

Higher Window Energy ratings can easily be achieved by the introduction of warm edge spacer bar (B) and replacing the standard glass with extra clear glass to achieve an A rating.
