

We are committed to safeguarding you and our team during your installation.

Here's what we are doing...

Keeping our hands clean

Keeping our distance

Minimising the time in your home

Bringing our own food and drink

Wearing gloves during installation

Using toilets away from homes where possible

Throughout your installation, we will minimise the amount of time we spend inside your property.

When we are out and about, it can be difficult to access washing facilities. So, we are keeping our hands clean throughout the day, by carrying our own cleanliness pack...

Handwash, soap or alcohol gel

Bottled water

Paper towels & tissues
